

# Investment Property Scorecard

Score every property the same way, before emotion gets involved. Print one per property.

## Property details

|                       |  |
|-----------------------|--|
| Address               |  |
| Asking price          |  |
| Property type / units |  |
| Date viewed           |  |

## Gross Rent Multiplier (GRM)

GRM = Property Price ÷ Annual Rent. Under 15 is strong, 15-18 is workable, over 20 rarely cash flows.

| Line                                  | Your numbers               |
|---------------------------------------|----------------------------|
| A. Purchase price                     | \$                         |
| B. Realistic monthly rent (all units) | \$                         |
| C. Annual rent (B × 12)               | \$                         |
| D. GRM (A ÷ C)                        |                            |
| Verdict                               | Under 15 / 15-18 / Over 20 |

## Monthly cash flow

| Line                           | Amount |
|--------------------------------|--------|
| Gross monthly rent             | \$     |
| Mortgage payment (P&I)         | - \$   |
| Property taxes                 | - \$   |
| Insurance                      | - \$   |
| Utilities (owner-paid)         | - \$   |
| Condo / maintenance fees       | - \$   |
| Repairs reserve (5% of rent)   | - \$   |
| Vacancy allowance (5% of rent) | - \$   |
| Property management (if used)  | - \$   |
| NET MONTHLY CASH FLOW          | \$     |

## Evaluation checklist

|                          | Item                                                                                   | Check |
|--------------------------|----------------------------------------------------------------------------------------|-------|
| <input type="checkbox"/> | Strategy fit. Does this property match my stated strategy (appreciation or cash flow)? |       |
| <input type="checkbox"/> | Rent evidence. Have I seen three comparable rentals at the rent I am assuming?         |       |
| <input type="checkbox"/> | Condition. Roof, furnace, windows, electrical and plumbing age documented?             |       |
| <input type="checkbox"/> | Capital needed. Renovation or turnover costs estimated with quotes, not guesses?       |       |
| <input type="checkbox"/> | Tenants. Existing leases, rents and tenant status reviewed in writing?                 |       |
| <input type="checkbox"/> | Rules. Zoning, second-suite legality and condo rental restrictions confirmed?          |       |
| <input type="checkbox"/> | Financing. Pre-approved at the rate I used in the math, with the stress test applied?  |       |
| <input type="checkbox"/> | Reserves. Six months of carrying costs available after closing?                        |       |
| <input type="checkbox"/> | Demand. Employers, transit, schools or campus nearby to keep it rented?                |       |
| <input type="checkbox"/> | Exit. Clear exit: hold, refinance or sell — with a rough timeline?                     |       |

## Scoring

8-10 checked: strong candidate, move quickly. 5-7 checked: fixable — identify what is missing before offering. Under 5: keep looking.
